

The course "The Art of Science" aims to fill this gap by specifically addressing issues that are needed to be effective in research.

This class is aimed at junior researchers and their mentors in all fields of science and engineering. Depending on the venue of the class and the duration of the short course we will determine which topics to cover. The class is given in the form of an interactive conversation between teacher and students.

Course Objective

- Upon completion of the course, participants will be able to:
- understand the considerations for choosing a research portfolio,
 - make a workplan for research that is underpinned by questions,
 - know common pitfalls and opportunities in research,
 - describe the elements of efficient oral communication,
 - comprehend fundamentals of time management.

Who Should Attend?

This course is aimed at junior researchers and their mentors in all fields of science and engineering.

Prerequisites

Participants should have some experience in research.

For course dates and registration, please refer to the Art of Science calendar.
